Please identify some specific things your instructor did that helped you learn in this course.: Moon Oulatta

- Give real world examples that related back to the class.
- Lectures were good for learning, and the amount of work to practice wasn't too much and we could practice on our own as well with the materials.
- Discussed how the material we discussed in class can help all of us in our future career of choice and how it relates to other aspects of business that we may be studying (accounting, finance, etc.)
- Thorough lectures and simplifying of textbook material to make it more understandable.

Please give your instructor some practical recommendations on ways to improve student learning in this course if you have any suggestions.: Moon Oulatta

- Powerpoints
- Post the slides regularly and grade attendance because I understand the reason to understand the slides are not posted is to make sure kids go to class, but maybe grading participation or attendance can help with class attendance.
- The pace of the class was too fast. Also, every class was the same looking at the board and listening to a lecture the entire time. I think not doing the same thing every class can make learning better.
