	%	0.00%	14.29%	0.00%	0.00%	85.71%						

- It was a pretty difficult course as we had so less time and had to learn a lot of things.
- Valuable class that taught me a lot but the work felt overwhelming. I like the professor but the workout was excessive. Great professor and great class but it needs to be structured differently.

Please identify some specific things your instructor did that helped you learn in this course.: Moon Oulatta

- all parameters professor helped a lot
- Professor is very helpful in each & every aspect. He gave personal attention to each & every doubt of mine. Glad to have professor like him.
- He is a very hardworking professor. He tries to make students understand everything but the course itself is not well planned. the 8 weeks is too short time to cover the amount of learning.
- He was open to help and I appreciate how much he was open to talk and he lectured a lot.

Please give your instructor some practical recommendations on ways to improve student learning in this course if you have any suggestions.: Moon Oulatta

- He very nice person
- Thanks a lot to be our mentor. Thank you for being a kind and caring Professor, Learned some great skills from you.
- No recommendations. He is perfect.
- It's his first time so he's not well known about the use of blackboard and other tools of teaching. I'm sure he'll get better with time. Giving students assignments from the first will help out a lot rather than giving every exam and assignments at the last two weeks. He's a great person and is willing to help anyhow even during his office hours. Being the first year of teaching he's not quite there yet but i'm sure he'll turn out to be one of the best professors CMU has looking at his work ethic and interest towards the subject.
- The class needs to be structured differently. All the assignments shouldn't be due at the end. That felt so overwhelming it would have been better if the assignments were spread out throughout the semester. The two exams also shouldn't be the main weight of the class. There should be more assignments spread out through the semester not two exams, a paper, and a presentation in the last two weeks of this 8 week course. I would also suggest uploading videos. Especially videos to help with excel. Also the professor must make sure that all students have the same version of excel so that there is a way for all students to follow the professor.
